Rolling Advertisement - Research Internship

Indian Institute of Information Technology Dharwad (IIIT Dharwad) invites applications from students for internships throughout the year. Prospective students are encouraged to explore the faculty profiles on the IIIT Dharwad website to familiarize themselves with our research areas and specializations. Interested students are welcome to reach out to individual faculty members to inquire about available internship positions, duration, and any additional details. We particularly encourage girls, differently abled and SC/ST students to apply for the internship programs and get exposure to the prevailing vibrant environment. Please note that selected candidates will be required to submit a bonafide certificate prior to accepting the internship offer.
